

NEOLACT ADVANCE OPTIGROW 2

Formulated with quality ingredients to complements you baby's diet.

6-12 months

Features

Neolact Advance OptiGrow 2 is a follow-on milk formula for babies up to 6 months of age, which, together with other foods, is part of a diversified diet.

With a unique composition especially developed for growing children from 6 months onwards.

This product is adequate for babies from 6 months onwards and should be used as part of a diversified diet. It should not be used as a substitute of breastmilk during the baby's first 6 months of life. The decision of introducing complementary food should be taken following the advice of a professional and based on the specific needs of each baby.

An appropriate nutrition is crucial for the present and future development of your baby. This is the reason why **Neolact Advance OptiGrow 2** has been formulated with quality ingredients that provide important benefits for the correct development of the baby.
